fis
ICELANDIC

We are proud to inform that National uses only Icelandic made FIS campers. A rugged two piece fiberglass shell makes this product the best and most durable pick-up campers ever made. - Total weight of amazing 330 kg.

Features:

- Push button airlift makes camping easy.
- Own 12V electric system / battery
- Gas bottle & battery located outside of facilities
- Tinted rear access door
- Tinted windows and sunroof
- Powerfull Vebasto Diesel heating w/adjustable thermo
- Double bed in lift up storage
- Durable floor lighting inside
- Adjustable roof vent
- Two-Burner Range
- Stainless Sink with water on demand
- Refrigerator Electrolux 230V/12V/Gas

Cooking and eating utensils: Pots and pans for cooking. coffee strainer, bread knives, broom and dust-pan dishes, forks, knives and glasses for 4 persons.

The electric system in the camper is 12V only and there is no outlet inside the camper which has a separate electrical system to the car and uses its own battery. Lighting is powered by 12V and refrigerator uses gas but can be switched to 12V while driving.

Cabin heat is generated by powerfull **Vebasto** Diesel fan and adjustable thermo switch is located inside the facilities. A convenient push button airlift makes camping very easy.

There is no bed-linen in the campers (can be rented, as well as sleeping bags).
